

2010 Brazos Valley Health Assessment

Project Summary & Goals

The 2010 Brazos Valley Health Assessment was a collaborative effort on the part of several local stakeholders to collect local data on the health status of the community. This was intended to be data useful for planning and resource development, as well as setting common priorities for the communities of the Brazos Valley that would guide collaboration.

The project goals are:

- To collect local data regarding health status of Brazos Valley residents
- To identify local resources
- To improve understanding of community issues
- To provide information to communities that is useful for planning and resource development
